

‘Life in a High Carbon World’. Institute for Life Sciences Conference

Atmospheric CO₂ levels are increasing and humanity is faced with pressing questions about the future in a high carbon world.

This conference aims to stimulate discussions across multiple disciplines and promote novel collaborations which improve the understanding on how increased carbon fluxes affect large scale systems and cycles and subsequently, the functioning of organisms, ecosystems and human societies that depend on them.

Tuesday 15 September 2015 | 09:00 18:00
Charnock Lecture Theatre
National Oceanography Centre Southampton

External speakers:

Professor Hans-Otto Pörtner,
Alfred-Wegener-Institute, Bremerhaven

Professor Mark Maslin, University College London

Conference Organising Team:

Prof Jörg Wiedenmann, Janette Thompson,
Dr Phyllis Lam, Dr Jessica Whiteside,
Dr Chris Hauton
