The transition from the old relief system of public works to this new act will cause great hardship and Kincaid proposes that the Aghamlish draining scheme be started to provide employment. before them if they stay where they are and anything is better than that ..... I make this recommendation [to allow the ships to sail] on the principle of profit and economy your estate will be of more value in the course of a year or two with the population reduced by 1000 than if they remained the cost of supporting these families for the next 7 months would be at least £1500 and at the end of that time they are still upon the property as dead weights ..... a better class of tenants obtained in larger farms in lieu of the small plots surrendered by the emigrants," 9 pages
