

Dr James Underwood *EngD Meng CEng MRINA*

Principal Naval Architect at BMT Defence and Security UK

Leading structural design and innovation in structural analysis across Royal Navy and Royal Fleet Auxiliary ships and submarines. Projects have delivered increased understanding of structural capacity against environmental and military loads, increased functional capabilities through integration of complex equipment, and increased performance to a broad range of complex vessels for UK and overseas navies.

University of Southampton Engineering Doctorate 2009–13
