

**Interactive Open Evening**

# Building collaborative research for effective ARM rehabilitation technologies

**9 November 2011 | 1730–2030**

**Health Sciences (Room 0019/Building 45), University of Southampton**

- Experience interactive demonstrations of our research
- An opportunity to discuss your ideas for making research relevant to clinical practice
- Find out about Postgraduate opportunities
- A great CPD and networking opportunity

**Programme outline -**

Continuous demonstrations and discussions so drop in when you like:

- Rehabilitation robotics - ARMEO
- Brain stimulation and neurophysiological assessment - TMS and Brainsight
- Biomechanical and neuromechanical assessment of the upper limb
- Web-supported programme of Constraint Induced Therapy - LifeCIT
- Child upper limb prosthetics
- Arthritis research / ring splints
- Haptics - devices to provide sensory feedback

Wine and nibbles will be provided throughout the evening
