Bio Imaging Symposium 2017

University of Southampton & ZEISS

The Symposium

This bio imaging symposium aims to bring together distinguished life science researchers from universities across England to share and discuss their research. Presentation topics will include developmental biology, neurosciences, cilia biology and cancer immunology.

The day, made up of numerous talks from well-respected speakers, will show how various imaging technologies have enabled biological breakthrough in recent years. These imaging technologies include: confocal imaging, superresolution imaging, multiphoton imaging, label-free imaging, lightsheet imaging, scanning electron microscopy and laser capture microdissection.

This is a free of charge event with refreshments provided.

Hosts

The event is proudly hosted by The Biomedical Imaging Unit (BIU) and The Institute for Life Sciences (IfLS) of the University of Southampton.

Symposium Details

Date: Friday 6th October 2017

Location: Centre for Human Development: Stem Cells and Regeneration, University Hospital Southampton, Tremona Road, Southampton, SO16 6YD

Agenda: To be finalised

Cost: Free of charge
